

I. Amendments to the Specification

A Substitute Specification, in clean version form, accompanies this response under 37 C.F.R. § 1.125. The Substitute Specification contains no new matter.

1. Please amend the title on page 1 with the following rewritten title:

Articulating Paper Foil Comprising a Color Layer ~~Coupling Agent~~

2. Please add the following new paragraph on page 2, line 22:

Summary of the Invention

In accordance with a first aspect of the present invention, there is provided articulating paper for use in dentistry, which comprises a support layer that is provided on one side with one colour layer comprising a colouring pigment, characterised in that there is present, on at least one colour layer, a layer that has at least one adhesion promoter for the colouring pigment(s) of the colour layer.

3. Please add the following new paragraphs on page 2, line 27:

Brief Description of the Drawings

Referring to the accompanying drawing, the invention is explained in greater detail by way of an example embodiment.

The foregoing and other objects and advantages of our invention will appear more fully from the following description, made in connection with the accompanying drawings of non-limiting preferred embodiments of the inventions, wherein like characters refer to the same or similar parts throughout the views, and in which:

FIG. 1 is a diagrammatic cross-section of an example embodiment of the articulating paper according to the invention.

4. Please replace the Abstract on page 10 with the following amended Abstract.

~~The present invention relates to an~~ An articulating paper for use in dentistry, which comprises a support layer that is provided on ~~at least~~ one side with ~~at least~~ one colour layer comprising a colouring pigment, wherein there is present, on ~~at least~~ one colour layer, a layer that has at least one adhesion promoter for the colouring pigment(s) of the colour layer(s).
